

Competency Profiles

What is a Competency Profile?

The Career and Technical Education Programs at Weymouth High School are guided by state standards for skills attainment, also known as competencies. Competency Profiles have been developed for each program and these profiles are used to identify what each student knows and is able to do as they progress through their chosen program. All Career and Technical Education students receive report card grades AND Competency Profiles.

Individual Competency Profiles....

All Career and Technical Education Programs in the state of Massachusetts are mandated to provide Competency Profiles to parents. An easy access online system has been implemented to view individual student competency profiles.

Parents of students currently enrolled in the Career and Technical Education program may view their student's competency profile by logging into www.weymouthschools.skillsport.com . The User ID and password are the same as those assigned to a student's X2 account.

Progress is updated at the end of Semester 1 and again at the end of the school year. This tracking system allows parents to view their child's competency profile.

Direct any questions in regard to accessing competency profiles in Skills Plus to:
